Projects

E-Medcast

Technologies used: *React-Redux, Firebase Hooks, Firestore*

- It uses Google authentication and everything has real-time chat functionality. The UI is responsive to different screens. I also used firebase hooks to pull data from firebase.

Zamdal Social media web App

Technologies used: *React- Redux, Material UI, Firebase*

- I created this website using modern technologies like Redux, firebase, Firestore, React flip move animation, with real-time functionality. I also used material UI for the icons

Movie live Streaming App.

Technologies used: *React, Redux, FlexBox, Firestore*

- I created this app using an external movie API from TMDB. It has a beautiful UI with hover effects, reusable react components was employed in designing the rows. Also react context API was also used.

Cathys Collection Store.

Technologies used: *React, Context API, Tailwind, Firestore*

- This app has a full E-commerce functionality, including login page, product page, checkout page and real payment. I linked all the pages using React-router-dom library referencing the Link tag, useHistory and useParams. Created it using some react redux functionality, hooks, context API and react hover effect, react flip move.

Experience

- Software developer—Xend Tech Limited Company
- Financial Secretary—Tranquil youth organization of Nigeria
- Business Developer/Branch manager-- Marpay Pharmaceuticals
